Springer

Pflügers Archiv · European Journal of Physiology

Founded in 1868 as „Pflügers Archiv für die gesamte Physiologie des Menschen und der Tiere“ by *E.F.W. Pflüger*. Edited by *M. Verworn, E. Abderhalden, A. Bethe, R. Höber, A. v. Muralt, H. Rein* et al.

Published: Vol. 1–29 (1876) Cohen und Sohn, Bonn; Vol. 30–92 (1901) E. Strauß, Bonn; Vol. 93–170 (1917) M. Hager, Bonn; since Vol. 171 (1918) Springer, Berlin.

Since 1920 Pflügers Archiv has included: „Archiv für Physiologie“ (Archiv für Anatomie und Physiologie, Physiologische Abteilung). Founded and edited by Johannes Müller, E. du Bois-Reymond, W. v. Waldeyer-Hartz et al. 1877–1914. Veit und Co., Leipzig, since 1915, Vereinigung Wissenschaftlicher Verleger, afterwards Walter de Gruyter, Berlin.

Copyright

Submission of a manuscript implies: that the work described has not been published before (except in the form of an abstract or as part of a published lecture, review, or thesis); that it is not under consideration for publication elsewhere; that its publication has been approved by all coauthors, if any, as well as by the responsible authorities at the institute where the work has been carried out; that, if and when the manuscript is accepted for publication, the authors agree to automatic transfer of the copyright to the publisher; and that the manuscript will not be published elsewhere in any language without the consent of the copyright holders.

All articles published in this journal are protected by copyright, which covers the exclusive rights to reproduce and distribute the article (e.g., as offprints), as well as all translation rights. No material published in this journal may be reproduced photographically or stored on microfilm, in electronic data bases, video disks, etc., without first obtaining written permission from the publisher.

The use of general descriptive names, trade names, trademarks, etc., in this publication, even if not specifically identified, does not imply that these names are not protected by the relevant laws and regulations.

While the advice and information in this journal is believed to be true and accurate at the date of its going to press, neither the authors, the editors, nor the publisher can accept any legal responsibility for any errors or omissions that may be made. The publisher makes no warranty, express or implied, with respect to the material contained herein.

Special regulations for photocopies in the USA

Photocopies may be made for personal or in-house use beyond the limitations stipulated under Section 107 or 108 of U.S. Copyright Law, provided a fee is paid. All fees should be paid to the Copyright Clearance Center, Inc., 21 Congress Street, Salem, MA 01970, USA, stating the ISSN 0031-6768, the volume, and the first and last page numbers of each article copied. The copyright owner's consent does not include copying for general distribution, promotion, new works, or resale. In these cases, specific written permission must first be obtained from the publisher.

Other regulations

Authors publishing in this journal can, under certain conditions, benefit from library and photocopy fees collected by VG WORT. Authors of German nationality and those resident in Germany, as well as citizens of Austria, Switzerland and member countries of the European Community, may apply to Verwertungsgesellschaft WORT, Abteilung Wissenschaft, Goethestrasse 49, D-80336 München, Germany, for detailed information.

Contents of volume 436

No 1 (pp 1–158) published 1 June 1998
No 2 (pp 159–308) published 1 July 1998
No 3 (pp 309–496) published 3 August 1998
No 4 (pp 497–630) published 1 September 1998
No 5 (pp 631–812) published 1 October 1998
No 6 (pp 813–1026) published 2 November 1998

This volume contains:
Nederlandse Vereniging voor Fysiologie:
Abstracts of the Young Physiologist Day, 20 March 1998, Utrecht, The Netherlands, **R1–R6**

Società Italiana di Fisiologia:
XXV Riunione Primaverile (Spring Meeting), 3–4 February 1998, Firenze, Italy, **R7–R26**

Belgian Society of Fundamental and Clinical Physiology and Pharmacology:
Abstracts of the Summer Meeting, 13 June 1998, Brussels, Belgium **R27–R32**

Aalkjær C, Mortensen FV, Jensen PE, Nielsen H: The role of $[Ca^{2+}]_i$, membrane potential and pH_i in the relaxation of rat mesenteric arteries to hyperosmolar acetate 705
Abad F → Gandía L
Abraini JH, Bouquet C, Joulia F, Nicolas M, Kriem B: Cognitive performance during a simulated climb of Mount Everest: implications for brain function and central adaptive processes under chronic hypoxic stress 553
Adams W, Trafford AW, Eisner DA: 2,3-Butanedione monoxime (BDM) decreases sarcoplasmic reticulum Ca content by stimulating Ca release in isolated rat ventricular myocytes 776
Afeche SC → Cassola AC
Ai T, Horie M, Obayashi K, Sasayama S: Accentuated antagonism by angiotensin II on guinea-pig cardiac L-type Ca-currents enhanced by β-adrenergic stimulation 168
Aitken PG, Borgdorff AJ, Juta AJA, Kiehart DP, Somjen GG, Wadman WJ: Volume changes induced by osmotic stress in freshly isolated rat hippocampal neurons 991
Al-Hillawi E → Kögler H
Ali Z → Kargacin GJ
Allen TJA,, Mikala G: Effects of temperature on human L-type cardiac Ca^{2+} channels expressed in *Xenopus* oocytes 238
Ament W, Lubbers J, Rakhorst G, Vaalburg W, Verkerke GJ, Paans AMJ, Willemsen ATM: Skeletal muscle perfusion measured by positron emission tomography during exercise 653
Andoh T → Oka K
Angelini D → Bianchi L
Araki T → Kubonoya K
Arita M → Obata T
Artalejo AR, Ellory JC, Parekh AB: Ca^{2+}-dependent capacitance increases in rat basophilic leukemia cells following activation of store-operated Ca^{2+} entry and dialysis with high-Ca^{2+}-containing intracellular solution 934
Ashley CC → Du GG
Ashley CC → Johns EC
Ashworth R → Zimprich F
Ayoub G → Maguire G
Backenroth R → Wald H
Baekgaard A, Bindslev N: Novel protein kinase C, nPKC, inhibition of murine bumetanide-sensitive Na^+,K^+, $2Cl^-$ cotransporter BSC1 in *Xenopus* oocyte 1998 189
Baldassare JJ → Padfield PJ
Barth P → Waldegger S
Bastide B, Mounier Y: Single-channel properties of the sarcoplasmic reticulum calcium-release channel in slow- and fast-twitch muscles of Rhesus monkeys 485
Battaglia A → Vacca G
